

Restore™ Mushroom® Packaging

An All Natural Protective Packaging Solution

Engineered, Renewable & Compostable

Powered by mushrooms

GROWN with Ecovative Technology

Sold under license by
Ecovative Design, LLC.

Made from 100% renewable materials using a low-energy process. Restore™ packaging is completely home compostable. Custom engineered designs reduce material waste, cube size and product damage.

Packaging that's all grown up

**100% renewable & compostable protective packaging —
powered by mushrooms**

Introducing Restore™ all natural protective packaging from Sealed Air, the first solution that's grown to meet your needs. Restore™ packaging uses the power of mycelium (the root-like structure of mushrooms) to bind agricultural waste into a strong, all natural composite that offers high-performance cushioning. This material is filled into custom designed forms where it grows into its final shape. The result is a dependable and renewable custom-engineered cushion.

Stable Sourcing, Proven Performance

Restore™ packaging is grown, not manufactured, using regionally sourced agricultural byproducts — the parts of crops that are not used for food or feed stock — combined with mycelium in a low-energy process. Our custom-engineered designs provide the right amount of protection using the least amount of material.

Restore™ packaging will protect your products from the harsh environment of the shipping and distribution cycle, but won't be harsh on the environment when that job is finished. Every Restore™ cushion is home compostable providing an alternative to traditional disposal methods.

An Engineered Solution

Sealed Air's worldwide network of Packaging Design Centers will collaborate with your team to design, form and test a custom packaging solution that is optimized for your business needs.

Back to the Beginning

Restore™ packaging is part of our SmartLife™ multifaceted approach to raise awareness about sustainable packaging and to advance Sealed Air's sustainable mission. Restore™ packaging is sustainably sourced using materials that are rapidly renewable, completely bio-based and home compostable.

Award Winning Innovation

Restore™ packaging has been recognized as a leader in sustainable technology by several leading publications and organizations, including:

- **Technology Pioneer** at the 2011 World Economic Forum in Davos, Switzerland
- **2011 Greener Package Award**, Non-FDA regulated packaging
- **Top "Diamond Winner"** in the 23rd DuPont Awards for Packaging Innovation
